- Sub-Metering Solutions
- Emissions Monitoring
- Electrical Installations, Plant and Process Troubleshooting and Design
- Project Management for Complex Energy Projects
- Product Design & Scientific Testing
- Site Safety & Risk Assessments
- Industrial and Commercial Maintenance Programs

Each business has different energy needs; and these need to be reflected in your choice of energy provider. The process of collecting and analysing all of the information required to find the best available supplier can often be daunting and time-consuming. We can take the hassle out of this process by providing an Electricity Tariff Review service in which we will do the legwork required to find you the best contract for your business.

Whether you are a small-to-medium business spending between \$2,000 - \$20,000 per year or a large business spending more than \$20,000 per year significant savings can generally be found.

Our electricity tariff reviews are saving our clients thousands of dollars each year. Some of the savings our clients have achieved in the last fortnight include:

Commercial

A residential apartment complex in Milton, QLD, saved **\$17,900** per year off their electricity market contract

Industrial

A recycled rubber production plant in Yatala, QLD, saved **\$9,950** per year off their electricity bill

Small Business

We saved a restaurant in Carindale, QLD, **\$1,400** per year off their electricity bill

We can perform an electricity tariff review for any kind of organisation (commercial, industrial, retail, franchise, national account...). Even if you are on an existing market contract we can forward date your next contract at today's market prices. These tariff reviews are typically finding 10-40% savings off current electricity costs, which can have a significant impact on the bottom line in this economic climate.

How your business can cut energy costs with an electricity tariff review

How does it work?

The process for getting started with a free electricity tariff review is simple.

1. Send a copy of your most recent energy bill to **info@cypherasiapacific.com**
2. We will contact you to discuss your energy consumption needs
3. We will find the best energy prices available in the market for your organisation
4. Sign a letter of authority allowing us to act on your behalf when liaising with energy retailers
5. Our partners will provide you with an offer from the best energy retailer for your organisation
6. You have 7 days to consider and agree to the offer
7. Choose your retailer and start receiving savings

An added benefit of our service is that you are not obliged to accept the offer that is presented to you, so even if we find out that your existing electricity tariff is the best available you do not need to switch retailers and can have peace of mind that you are on the best rates.

What does it cost?

Unlike most of our competitors, we have negotiated with our partners to provide a service at no cost to our clients. We believe that energy retailers should pay for the privilege of having the opportunity to provide energy to new clients; and that you should receive the savings without having to pay for the benefit. Instead of charging our clients for this service we receive a commission from energy retailers.
